MEMORANDUM For Staff,

Subject: Organizational changes within the Engine Research Division.

1. The anticipated operation of the Propulsion Sciences Laboratory early in 1952 requires that leadership and an organizational framework be established at this time for operations and research in these facilities. Accordingly, the following organization changes are made within the Engine Research Division to be effective immediately.

2. The activities of the Propulsion Sciences Laboratory are to be combined with those of the Altitude Wind Tunnel. To perform the operations functions for these two facilities, a new branch is created under the leadership of Mr. A. W. Young to parallel the existing Operations Branch under Mr. A. E. Biermann. The group under Mr. Biermann will be responsible for operations in the Altitude Test Chambers and the remaining facilities of the Engine Research Division. Similarly, the research activities in the Propulsion Sciences Laboratory and Altitude Wind Tunnel will be combined into a branch headed by Mr. D. S. Gabriel to parallel the existing Altitude Test Chambers Branch under Mr. W. A. Fleming, whose responsibilities are unchanged.

3. As a result of these changes, the organization of the Engine Research Division will be as follows:

Division Chief -- Eugene W. Wasielewski
Acting Division Chief - Bruce T. Lundin
Staff Assistant - Fred Vosa
Assistant to Division Chief - Richard P. Krebs

Engines Branch I
Branch Chief - David S. Gabriel
Assistant Chief - Martin J. Saari
Head, Section A - E. William Conrad
Head, Section B - Carl Meyer
Head, Section C - Reece V. Hensley
